

1 Community Safety Alert: Updated 19:14 CST, Friday Oct. 11th 2019

2 -----

3 An individual identified as Jonathan Michael Butkovsky (aka Mix) has a
4 history spanning at least several years that may pose a danger to
5 organizations, groups and persons with collected reports of him
6 stalking, stealing, selling believed to be stolen and otherwise
7 unlicensed software and technology out of public/private spaces. He has
8 misrepresented himself as an authority to those spaces & organizations.

9
10 The individual has reportedly been banned indefinitely in the Chicago
11 area with FreeGeek (1), in Austin area of Texas with ATX hacker
12 space (2) as well as global ban from the Vampire Network (VVC) (3).
13 These organizations have also mentioned additional spaces and groups
14 he has been banned from, including those from Texas & Colorado.

15
16 Two of his social media profiles have demonstrated activity on those
17 timelines of persons with associations with ex-military & white
18 supremacists groups (4).

19
20 Background report has shown living addresses that have turned out to be
21 storage facilities and otherwise private spaces not zoned for living.
22 Background report also shows that he has three concurrent drivers
23 licenses registered in three states that are status "suppressed" (5)
24 which indicates that he is legally registered under a fictitious name
25 as a government protection due to being a relative of a federal
26 officer or government protection due to being a federal officer himself.
27 I was able to find an archived police blotter report from two years ago
28 of the individual being arrested for illegal possession of a lethal
29 weapon (6). That criminal report does not show up on his background
30 check.

31
32 A private investigator friend of mine looked into his background check
33 and advised to "get him out of your space," indicating that he is known
34 for theft of personal property (7).

35
36 The individual is known to use social engineering tactics to get
37 involved in many capacities that puts personal property and privacy at
38 risk. In just a few days of my knowing him he has attempted to get me to
39 participate in installing unlicensed software on a batch of computers at
40 my prior private residence (8). He has also gifted me equipment that
41 maybe stolen property, with some gifting that was not consensual or
42 agreed upon. In that same time frame he has also pushed me to accept his
43 invasion of my property in the guise of "organizing my room," as well as
44 masking himself as homosexual to sleep with me and making his way into
45 my bedroom by leaving his clothing articles in my closet without my
46 knowing and planting what appeared to be a journal of his that could be
47 evidence of mental instability (9).

48
49 He also stole property from a contact he got through me of which my
50 contact recovered in exchange for getting the computer property back to
51 him. A confident of mine reported that he falsely accused that property
52 as stolen from him that he had just "recovered," during a public
53 gathering.

54
55 His invasion of privacy has included not only the involvement of
56 pushing his way into organizing my room, he has also looked over my
57 shoulder each and every time I was using my phone. When he noticed that
58 I noticed that invasion of privacy he started up a conversation with me.

59
60 When the discussion of consent came up among my friends being social
61 with the individual, he shouted "I do not believe in consent."

62
63 Individual is described as being very pushy and spreads degrading rumors
64 and lies of others. He often will excuse his behavior and tactics as a
65 result from his supposed "autism" diagnosis. An archived entry in the
66 Encyclopedia Dramatica infers through their mockery to his 10+ years of
67 supposed diagnosis being excused for behavior that puts others at
68 risk (10).

69
70 His archived online journal from 2008-2009 reveals his concerns of his
71 mother accusing him of pedophilia and his family being compared in the
72 film "Meet the Fockers," implying perhaps that his family is involved in
73 military intelligence/CIA (11).

74
75 The individual has accepted and appeared as minor character roles in
76 some Hollywood film productions that span the last ten years (12).

77
78 Please be guarded and vigilant when dealing or avoiding this individual,
79 for both personal and public safety interests.

80
81 Sincerely,
82 Jason S. Page
